Geography Curriculum

	Use simple field and observational skills.	<ul style="list-style-type: none"> I know how to make simple conclusions about a fieldwork enquiry. 		
Spring Hot and cold deserts	<p>Identify the location of hot and cold areas of the world in relation to the Equator and the North and South Poles.</p> <p>Identify seasonal and daily weather patterns in the hot and cold areas.</p>	<ul style="list-style-type: none"> I know the difference between weather and climate. I know what a desert is. I know where hot and cold deserts are located. I know the features of hot deserts. I know the features of cold deserts. I know the difference between hot and cold deserts. 	<ul style="list-style-type: none"> I can tell the difference between climate or weather. I can identify the key features of the desert. I can locate deserts on a map and also on Google Earth. I can create my own maps of hot and cold deserts. I can identify features of a hot desert using photographs and then sort them into human and physical features. I can identify features of a cold desert using photographs and then sort them into human and physical features. I can review my knowledge of hot and cold deserts, and then compare Sahara and the Antarctic deserts in a Venn diagram. 	How do these differing climates impact everyday life?

Geography Curriculum

<p>Summer</p> <p>Rivers, Seas and Oceans</p>	<p>Use aerial photographs to recognise landmarks and key human and physical features of a river.</p> <p>Use simple compass directions and directional language to describe routes of a river on a map.</p>	<ul style="list-style-type: none"> • I know rivers, lakes, seas and oceans are all bodies of water. Rivers flow into lakes and seas; seas connect to oceans. • I know rivers travel from highland areas (the source) to lowland areas (the mouth). • I know how land/rivers are used by humans. • I know the seas that surround the UK are the North Sea, the Irish Sea and the English Channel. • I know there are five oceans in the world. These are larger than seas. • I know the seas around the UK flow into the Atlantic Ocean. • I know the human uses of seas and oceans. • I know how to protect our seas and oceans. 	<ul style="list-style-type: none"> • I can identify water in our local area. • I can identify rivers, lakes, seas and oceans and state which ones have fresh and salt water. • I can label a diagram with the journey of a river. • I can describe the landscape near the source and mouth of a river. • I can look at photographs and decide whether they show economic or leisure. • I can discuss the risks of flooding with the use of aerial photographs. • I can name the seas around the UK and the oceans of the world. • I can discuss the similarities and differences between seas and oceans using maps to support this. • I can discuss how humans use rivers for economic and leisure activities. • I can describe the use of seas and rivers to humans. • I can explain the threat of overfishing and why overfishing is not sustainable. 	<p>To consider how travelling the oceans led to new developments of new countries.</p>
--	--	--	---	--

Geography Curriculum

Year 3

<i>Term & Focus</i>	<i>National Curriculum Objectives</i>	<i>Knowledge</i>	<i>Skills</i>	<i>Diversity and Inclusion opportunities</i>
Autumn United Kingdom	<p>Name and locate the counties and cities of the United Kingdom, geographical regions and their identifying human and physical characteristics, key topographical features and land use patterns and understand how some of these aspects have changed over time.</p> <p>Identify different types of settlement.</p> <p>Use fieldwork to observe, measure, record and present the human and physical features in</p>	<ul style="list-style-type: none"> • I know the UK is made of four countries: England, Scotland, Wales and N Ireland; Great Britain is made up of England, Scotland and Wales; British Isles is made up of England, Scotland, Wales, Northern Ireland and Ireland. • I know regions in England and the UK are spilt into counties. • I know the name of the county that I live in. • I know the three longest rivers in the UK are the Severn, Thames and Trent. • I know physical features of The New Forest include forests, river, and valley. • I know settlements can be hamlets, villages, towns and cities, depending on their size. • I know human features of the New Forest include national parks, hamlets, villages. • I know land use in The New Forest has changed over time (green 	<ul style="list-style-type: none"> • I can use a map of the UK and identify and locate the four countries. • I can use maps to identify differences. • I can use an 8-point compass to locate regions of England. • I can identify English counties using a map and locate the county in which I live. • I can identify and locate key UK rivers and mountain ranges on a physical map. • I can use an OS map extract and OS map of the local area to identify what the map shows. • I can use OS map symbols and identify which are human and physical features and catagorise using correct symbol with colour. • I can understand what a National Park is and their location in the UK, with the use of a map. 	<p>Identify different types of settlements and look at the impact these have on opportunities. Are the opportunities equal for everyone- do some have access to more than others? Do you think children who grow up in a hamlet have the same opportunities as children who grow up in a city?</p> <p>Review different types of maps that are not 'UK centered'.</p>

Avonwood Primary School

■ Ambition ■ Confidence ■ Creativity ■ Respect ■ Enthusiasm ■ Determination

Geography Curriculum

	the local area using a range of methods, including sketch maps, plans, graphs and digital technologies. Primary/ secondary data.	space is filled; towns have become larger).	<ul style="list-style-type: none"> I can locate the New Forest and complete a written paragraph with key facts. I can use photographs and vocabulary to understand how people use physical features in the New Forest. 	
Spring Volcanoes	Locate the world's countries, using maps to focus on North America concentrating on the key physical characteristics.	<ul style="list-style-type: none"> I know the structure of the Earth. I know what a volcano is. I know how volcanoes form. I know where we would find a volcano. I know that all volcanoes are not the same. I know the effects of volcanoes on humans. Case Study of a volcano – Mount Etna and La Soufriere. 	<ul style="list-style-type: none"> I can identify the different layers in the structure of the Earth. I can describe how volcanoes are formed. I can identify where volcanoes are located. I can discuss the differences between different types of volcanoes. I can discuss the effects that volcanoes have on humans. I can carry out research about the impact of physical geography on the human population. 	To consider how some countries and areas in the world are more likely to suffer as a result of their location and the impact this could have. To also consider the benefits of living near a natural hazard.

Geography Curriculum

<p>Summer Looking at Europe and Tourism</p>	<p>Locate the world's countries, using maps to focus on two contrasting European countries, concentrating on their environmental regions, key physical and human characteristic and major cities.</p> <p>Use maps, atlases, globes and digital/computing mapping to locate countries and describe features studied.</p> <p>Understand geographical similarities and differences through the study of human and physical geography of the contrasting countries.</p>	<ul style="list-style-type: none"> • I know Europe is a continent made up of a number of different countries. • I know each country of Europe has a capital city. • I know there are a variety of human and physical features in the Alps. • I know the Amalfi Coast is located in Italy and there are a variety of human and physical features along the Amalfi Coast. • I know tourism is the business of supporting and encouraging tourists and has both positive and negative impacts. • I know Bournemouth is a popular tourist destination. • I know the Amalfi Coast and the Alps experience many positive impacts from tourism and are mainly classified as economic and social. • I know the Amalfi Coast and the Alps experience a number of negative impacts from tourism and are mainly classified as environmental and social. • I know the Amalfi Coast and the Alps rely heavily on tourism, and there are ways that it can be managed responsibly. 	<ul style="list-style-type: none"> • I can use a political map of Europe to identify the countries and capital cities. • I can use an 8-point compass to give directions. • I can use an atlas and a physical map of Europe, children will locate the countries in The Alps mountain range. • I can classify human and physical features. • I can use an atlas and a physical map of Italy, children will locate the Amalfi Coast. • I can classify human and physical features with the use of photographs. • I can compare tourism in Bournemouth the Alps and the Amalfi coast. • I can classify the positive impacts of all locations, recording results in a table. • I can classify the negative impacts of all locations, recording results in a table. • I can generate ideas for how to be a responsible tourist, and sort them into which is more helpful for the Alps and/or the Amalfi Coast. 	<p>To compare two types of European countries and how tourism may impact those that live there.</p>
--	---	--	---	---

Geography Curriculum

Year 4

<i>Term & Focus</i>	<i>National Curriculum Objectives</i>	<i>Knowledge</i>	<i>Skills</i>	<i>Diversity and Inclusion opportunities</i>
Autumn Looking at South America and Brazil	<p>Locate the world's countries using maps to focus on South America concentrating on their environmental regions, key human characteristics, countries and major cities.</p> <p>Identify land-use patterns and understand how some of these aspects have changed over time.</p> <p>Understand key aspects of economic activity including trade</p>	<ul style="list-style-type: none"> • I know the lines of longitude and latitude are imaginary lines that help us locate places on Earth. • I know the Equator splits the Earth into the Northern and Southern Hemispheres; the Prime Meridian splits the Earth into the Eastern and Western Hemispheres. • I know Brazil's political geography is split into five regions. • I know Brazil's physical geography is split into three main regions: the Amazon rainforest, the Cerrado and the Mata Atlantica. • I know indigenous people are the first people who lived in the place and the generations of people who came after. • I know the Kayapo are indigenous people who live in the Amazon rainforest. • I know Rio de Janeiro is one of the largest cities in the Brazilian highlands. 	<ul style="list-style-type: none"> • I can use a map of the world and identify, locate and name key lines of latitude and longitude and the 4 hemispheres. • I can use an atlas with political map to name and locate countries in South America, including Brazil. • I can use political map of Brazil and name the five regions. • I can use a physical map, photographs and vegetation descriptions to identify the three key regions. • I can use Google Earth, show the location of where the Kayapo tribe live in the rainforest. • I can examine similarities and differences between this and a rural village in the UK. • I can experience virtual fieldwork of Brazil using the virtual tour platform. • I can use photographs to examine any similarities and differences 	<p>Brazil- comparison between Kayapo and Rio. What are the similarities? What are the differences? What impact does that have on people's opportunities? Do children who grow up in Kayapo have the same life opportunities as the children who grow up in Rio? If so, how?</p> <p>Celebrate cultural differences between Rio and the UK.</p>

Avonwood Primary School
 The best in everyone™
 Part of United Learning

■ Ambition ■ Confidence ■ Creativity ■ Respect ■ Enthusiasm ■ Determination

Geography Curriculum

	links, and the distribution of natural resources including energy, food, minerals (mining) and water.	<ul style="list-style-type: none"> I know some of its population live in wealthy areas that can be popular with tourists. 	between the two areas of Rio (rich and poor) and with their life.	
Spring Tropical rainforests	<p>Describe and understand key aspects of physical geography, including: climate zones and biomes.</p> <p>Identify land-use patterns and understand how some of these aspects have changed over time.</p>	<ul style="list-style-type: none"> I know rainforests are found in different continents in the world. I know rainforests are found in the region known as the Tropics. I know about the biomes of tropical rainforests. I know rainforests are made up of four different layers. I know plant and animal species have adapted to live in the rainforest in a number of ways. I know the adaptations can be identified from photographs. I know there are many natural resources in the rainforest which give humans benefits. I know the destruction of the Amazon rainforest is occurring at an alarming rate. I know I have an awareness of the types of human activity that are destroying the rainforests. I know how to help protect the rainforests. 	<ul style="list-style-type: none"> I can talk about the differences between temperate and tropical rainforests. I can identify wildlife that live in the rainforests. I can locate the tropics in five continents. I can explain about global atmospheric circulation and why the rainforests are located in the tropics. I can label the processes of global atmospheric circulation on a diagram. I can draw a cross-section of a typical tropical rainforest to scale. I can discuss the importance of the rainforests, including the discovery of important medicines and the range of other products that we may use daily. I can review uses of the rainforest by the Kayapo tribe and consider sustainable deforestation. 	Consider how the physical features would impact settlements in a tropical rainforest.

Geography Curriculum

			<ul style="list-style-type: none"> • I can sort impacts of deforestation into positive and negative, and local or national/global impacts. • I can discuss different points of view about the issue of deforestation. 	
Summer Earthquakes and Human settlements	<p>Describe and understand key aspects of physical geography, including earthquakes</p> <p>Understand key aspects of economic activity including trade links, and the distribution of natural resources including energy, food, minerals (mining) and water.</p>	<ul style="list-style-type: none"> • I know earthquakes occur along tectonic plate boundaries. • I know the movement of the plates causes earthquakes to occur. • I know earthquakes are measured using the Richter Scale. • I know the effects of the earthquake using a case study and categorising these into economic and social effects. • Case study 1 – The effects of the Haiti earthquake • Case study 2 – The effects of the Tohoku earthquake in Japan • I know about responses to earthquakes. • I know how humans can reduce the effects of earthquakes. 	<ul style="list-style-type: none"> • I can label the anatomy of an earthquake under the surface. • I can locate earthquakes of a lower magnitude using number and letter coordinates. • I can write a paragraph explaining how earthquakes can be measured. • I can identify the effects of an earthquake using photographs and group them as social, economic and both. • I can use case studies to compare responses to earthquakes. • I can explain how earthquakes can be predicted. • I can design my own earthquake building. 	<p>To consider how some countries and areas in the world are more likely to suffer as a result of their location and the impact this could have.</p> <p>Discuss how humans have adapted to live in these areas.</p>

Geography Curriculum

Year 5

<i>Term & Focus</i>	<i>National Curriculum Objectives</i>	<i>Knowledge</i>	<i>Skills</i>	<i>Diversity and Inclusion opportunities</i>
Autumn Investigating World Trade	<p>Locate the world's countries.... concentrating on their environmental regions, key physical and human characteristics, countries and major cities.</p> <p>Describe and understand key aspects of physical geography, including: climate zones</p> <p>Describe and understand key aspects of human geography including key aspects of economic activity - trade links, and the distribution of natural</p>	<ul style="list-style-type: none"> • I know examples of natural resources. • I know what fossil fuels are and how humans use them. • I know what natural resources are and that they can be renewable and non-renewable. • I know people can be employed in different industry sectors. • I know trade is the process of buying and selling goods. Imports are goods that are brought into the country. Exports are goods that are traded out of the country. • I know the UK imports food from across the world. • I know there have been changes in what is grown where, how it is farmed, how it is transported and how it is sold. 	<ul style="list-style-type: none"> • I can sort images into renewable and non-renewable natural resources. • I can discuss the production and manufacturing of goods and which sector makes them. • I can categorise different jobs into the 4 different employment industries. • I can compare UK and China and how their employment structure has changed over time. • I can discuss trade, imports and exports. • I can research where food comes from using the packaging it is in and locate it on a map. • I can use 4-digit grid references and locate places they could buy imported foods on an OS map using grid references. • I can explain the changes in agriculture, trade, transport and selling over the last four centuries. 	<p>To consider the impact of how natural resources are distributed unevenly and how this puts some countries at an economic advantage.</p>

Avonwood Primary School
 The best in everyone™
 Part of United Learning

■ Ambition ■ Confidence ■ Creativity ■ Respect ■ Enthusiasm ■ Determination

Geography Curriculum

	resources including energy, food, minerals (mining) and water.	<ul style="list-style-type: none"> I know agriculture has moved from subsistence to commercial so that food can be traded. I know fair trade is a way of making sure that farmers are paid a fair price for the food they grow. 	<ul style="list-style-type: none"> I can argue for and against Fairtrade and formulate my own opinions based on my conclusions. 	
Spring Looking at North America and water	<p>Physical geography, including climate zones, biomes and vegetation belts, river, mountains, and the water cycle.</p> <p>Human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water</p>	<ul style="list-style-type: none"> I know the processes that make up the water cycle. I know there are three courses in a rivers journey. I know there are different landform features on the journey. I know the location of some North American rivers. I know how waterfall are formed. I know the features of middle and lower course rivers in North America – meanders and floodplains. I know how humans use land near a river – agriculture, recreation, housing, industry and forestry. I know land use differs along the rivers of North America. 	<ul style="list-style-type: none"> I can identify the processes using a labelled diagram of the water cycle. I can recognize and label the three courses of a river. I can locate rivers in North America. I can label the stages of waterfall formation. I can explain the features of Niagara Falls. I can locate meanders on a map. I can explain the benefits of floodplains for arable agriculture. I can catagorise land use along a river. I can calculate and present our water consumption using a graph. I can use string to measure sections of a river on maps with a range of scales and then use my skills on a river field trip. 	<p>To consider the impact of physical geography on some aspects of human geography including settlements and agriculture.</p> <p>Rivers trip to measure and conduct other fieldwork skills – dependent on the weather.</p>

Geography Curriculum

		<ul style="list-style-type: none"> I know river features can be identified on a variety of resources – RIVERS TRIP 		
Summer Climate across the world	<p>Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region within North or South America</p> <p>Physical geography, including: climate zones and biomes</p>	<ul style="list-style-type: none"> I know there are six main climate zones – polar, temperate, arid, tropical, Mediterranean and mountains – and they often appear in more than one continent. I know some climate zones usually have a much higher population density than others I know climate data can be shown on a climate graph, this is precipitation and temperature. I know biomes are areas in the world that, because of similar climates, have similar landscapes, animals and plants. I know Vegetation belts are areas that have similar plant life, owing to similar climate, soil and drainage. I know global warming and climate change both happen 	<ul style="list-style-type: none"> I can match photographs of each climate zone and its description. I can interpret a climate graph and relate this to the climate zones I have studied. I can draw my own climate graph. I can match the various flora that are distinct to each biome, and link this to the climate zone in which they are found. I can describe vegetation belts. I can explore the greenhouse effect, and how greenhouse gases cause global warming then to report my findings to the class. I can label a diagram showing the greenhouse effect. I can make links with various types of climate change and how they may impact individuals all around the world. 	<p>To consider how the daily lives of people may look different in different biomes and why.</p>

Geography Curriculum

		<p>naturally but both have been dramatically accelerated by human activity.</p> <ul style="list-style-type: none"> • I know it is caused by too many greenhouse gases in the atmosphere, from burning fossil fuels, agriculture, deforestation and too much waste. • I know global warming relates to an increase in the Earth's temperature only; climate change is caused by this and has a broader set of changes. • I know the effects of climate change on the UK include drought, heatwaves, sea level rise and flooding. These effects can be particularly damaging to our vulnerable species. • I know vulnerable biomes are areas sensitive to change and most at risk of damage due to climate change.

Geography Curriculum

Year 6

<i>Term & Focus</i>	<i>National Curriculum Objectives</i>	<i>Knowledge</i>	<i>Skills</i>	<i>Diversity and Inclusion opportunities</i>
Autumn Improving the environment	Describe and understand key aspects of human geography, including types of settlement and land use, economic activity and trade links, and the distribution of natural resources including energy, food minerals and water. Use maps, atlases, globes and digital/computer mapping to locate countries	<ul style="list-style-type: none"> • I know some locations are better suited to some renewable energy sources than others, based on their physical and climate features. • I know plastic waste is created across the world, and often ends up in oceans. • I know The Great Pacific Garbage Patch is an area of plastic waste in the Pacific Ocean, three times the size of Spain and Portugal combined • I know plastics take hundreds of years to break down. • I know plastic pollution can be reduced by using less single-use plastic. • I know the UK exports some of its plastic to countries overseas. • I know sustainable cities limit damage to their environment. • I know sustainable cities are found across the world 	<ul style="list-style-type: none"> • I can locate the renewable energy source in the world using named examples and photographs. • I can discuss in class on the usefulness of plastic, its sources and where it ends up. • I can use photographs, to identify some of the main sources of plastic and its pollution. • I can use latitude and longitude and then locate the GPGP. • I can brainstorm the problems of plastic pollution in groups using photographs as prompts. • I can think of suitable alternatives to the plastic problem, including recycling. • I can define what a sustainable city is and its characteristics by observing photographs. 	<p>To reflect on our use of plastics as a community and what we could do to improve it.</p> <p>To look towards how to change our future for the better.</p>

Geography Curriculum

	and describe features studied	<ul style="list-style-type: none"> I know actions at the local or national scale can have a huge impact on the global scale. 	<ul style="list-style-type: none"> I can consider what I can do at a local scale that will improve the environment at the local, national or even global scale. I can suggest what we could do in our local area/school to improve the environment. 	
Spring On the move	<p>Human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water.</p> <p>Understand geographical similarities and differences through the study of human and physical geography of a</p>	<ul style="list-style-type: none"> I know Maslow's hierarchy of needs show what humans need to survive and thrive. I know migration is the process of moving from one place to another. It does not have to be between countries, but where it is it is called immigration (in) or emigration (out) I know people migrate because of push and pull factors I know voluntary migration usually happens because of economic or social factors. I know expectations of migration are not always met in reality - European case study: Poland to UK 2004-today I know there are similarities and differences between the stories of voluntary migrants. I know forced migration happens as a result of life-threatening events, such as conflict or physical disasters I know asylum seekers are people who are forced to leave their country. They apply for asylum and, 	<ul style="list-style-type: none"> I can create my own hierarchy (similar to Maslow's). I can use some of key vocabulary around migration I can examine a case study (Poland → UK is provided, but others could be used). I can compare migration case studies and find similarities and differences. I can locate examples of migration on a map and decide whether each is forced migration because of conflict or disaster (or both) and whether each is internal or international (or both). I can consider why individuals were forced to leave Syria, what life was like on the journey, and what life can be like for refugees in the UK – case study of an individual used. 	<p>To consider our local area of Bournemouth and what push and pull factors it has.</p> <p>To discuss the different cultural opportunities that have been brought to the UK due to migration.</p> <p>Invite the children to discuss any migration in their own life.</p>

Geography Curriculum

	region of the United Kingdom, a region in a European country, and a region in North or South America	<p>if it is accepted, they are granted refugee status.</p> <ul style="list-style-type: none"> I know refugees are given international protections and support in settling in a different country – Case Study - Syria/Ukraine to countries in Europe I know many people migrate to and from our local area, which impacts our community. 	<ul style="list-style-type: none"> I can reflect on my local town (Bournemouth) and the pull factors it has. 	
<p>Summer</p> <p>I am a Geographer</p> <p>How is the land used in my local area, and does the area need improving?</p> <p><i>What should the future of our school's allotment grounds be?</i></p>	<p>Understand geographical similarities and differences through the study of human and physical geography of a region of the United Kingdom, a region in a European country, and a region in North or South America</p> <p>Human geography, including: types of settlement and land use,</p>	<ul style="list-style-type: none"> I know how to consider health and safety needs for fieldwork, so introduce a risk assessment to the class and look for ideas of the categories to consider. Decide on the required equipment needed for the fieldwork. I know how to design a questionnaire, land use survey and Environmental Quality Index (EQI) survey to carry out on fieldwork. I know how to collect primary data of the local area using the variety of fieldwork methods (questionnaire, land use survey and Environmental Quality Index (EQI) survey). I know data is recorded on data recording sheets. I know how to collate the data as a class where appropriate. 	<ul style="list-style-type: none"> I can plan an enquiry. I can collect primary data. I can collate and present results. I can present the results. I can analyse and evaluate. I can use OS map, Google Earth and Google Maps to locate the survey area. I can formulate the geographical question/hypothesis to test, with ideas from the class, in relation to the local area. I can write up the methodology in class of the various fieldwork techniques carried out. I can present fieldwork results using a range of presentation methods such as field sketch, site plan, pictogram and graphs. 	What impact can we have as children on the land that surrounds us and how it is used?

Geography Curriculum

	<p>economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water</p>	<ul style="list-style-type: none"> • I know how to tabulate the data formally using a relevant format/s (e.g. turning a tally chart into a frequency table). • I know how to construct and plot graphs using correct axes, scale and key. • I know how to draw conclusions from the fieldwork enquiry; state these clearly. • I know how to link back to the hypothesis set at the outset and try to 'accept or reject' if according to the findings. • I know how to evaluate the data collection methods used; and suggest improvements to the survey if it was to be repeated in the future.
